TECHNICAL PROJECTS

Portfolio Site - Github: [Source](#) | Hosted: <https://www.itslizkim.com>

Personal Web Development and Software Engineering portfolio site

- Built in **Gatsby JS** to prioritize performant static pages.
- Styled with **custom CSS**.

Learn A Lingo - Github: [Frontend/Backend](#)

An educational children's web app to learn a variety of languages with the ease of flashcards.

- Developed a **Rails API** to persist user account information.
- Utilized *Merriam Webster's Learner's Dictionary API* for audio and vocabulary.
- Built front end in **React**, **Redux**, and **Semantic UI**.

GiffyMind - Github: [Frontend/Backend](#) | Hosted: <https://www.giffymind.netlify.app/>

Re-creation of the classic computer game MasterMind, where the user has to crack the four unit gif code within an allotted number of guesses. *Group project*.

- Built user interface using **React**.
- Developed a **Rails API** back end to render a random code array of 4 gifs.
- Styled front end with **custom CSS** and **Bootstrap**.

Outfit Liker - Github: [Frontend/Backend](#)

Social media site designed for fashion lovers that enables individuals to post pictures of outfits that could then be shared and liked amongst the community members.

- Built front end in **vanilla Javascript** and **custom CSS**.
- Developed a **Rails API** back end to persist user's account and posted images.
